## Profile

Computer Engineering (Universidad Nacional de Córdoba, 2011). Pythonist since 2006, focused on Developer Experience, internal tooling, backend systems and shipping infrastructure.

Staff-level engineer with experience building engineering platforms from the ground up in high-scale e-commerce environments.

Experience leading distributed teams and open source projects; advocate of open standards, pragmatic architecture, and engineering productivity.

Strong in agent-assisted development and continuous learning as a daily practice.

I maintain a technical weblog in Spanish and English at [mgaitan.github.io](https://mgaitan.github.io).

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                          |

**Phasety**, Co-founder

- Scientific software for thermodynamic modeling in the oil and gas industry.
- Technologies: NumPy, SciPy, Fortran, Matplotlib, Jupyter, etc.
- Incubated by Universidad Nacional de Córdoba (Programa Tecnoempreendedores 2011-2013).

Córdoba, Argentina

Feb 2011 – Aug 2013

2 years 7 months

**Machinalis**, Django Developer

- Built web applications and APIs with Django.

Córdoba, Argentina

Apr 2011 – Aug 2012

1 year 5 months

## Projects

---

**sphinxcontrib-mermaid**

Sphinx extension for Mermaid diagrams.

- Community-maintained open source project.

**waliki**

Wiki engine based on Django and Git.

**fortran\_magic**

IPython/Jupyter extension to integrate Fortran in notebooks.

**python-package-copier-templates**

Python project templates with Copier and best practices.

**pytest-portion**

Pytest plugin for incremental/portion-based test runs.

**richterm**

Terminal/CLI utilities with Rich for DX.

**preciosa**

Collaborative platform for price data collection.

**curso-python-cientifico**

Python course for science and engineering.

**Other projects**

I have more than 300 projects, many of which I still maintain.

## Open Source

---

Notable contributions to Cython, MoviePy, IPython/Jupyter, Django, and Ruff.

Maintainer of tools and extensions for the Python ecosystem.

## Education

---

**Universidad Nacional de Córdoba**, Computer Engineering

- Capstone project: GPEC 2010 (Global Phase Equilibrium Calculations). A visualization tool for phase equilibrium diagrams based on equations of state.
- Advisor: Phd. Martín Cismondi
- Teach assistant, Operating System I and II (UNC, 2007-2009).

Córdoba, Argentina

Mar 2005 – Mar 2011

**Universidad Nacional del Comahue**, Electronic Engineering

- 19 courses completed.

Neuquén, Argentina

Mar 2001 – Dec 2003

**EPET Nro 14**, Electronics Technician

- GPA 9.37.

Neuquén, Argentina

Mar 1995 – Dec 2000

## Skills

---

**Languages:** Python, JavaScript, Fortran, SQL, Rust (maturin / PyO3 integration)

**Backend:** Django, FastAPI, REST/GraphQL APIs, multi-service architectures

**Tooling:** Internal CLI design, CI/CD architecture (GitHub Actions), Rust-Python integration, pytest, packaging standards

**Data and optimization:** Pandas, ETL, data cleaning, visualization, scraping, SciPy, OR-Tools, NumPy

**ML/LLMs:** RAG architectures, LLM integration in internal tools and products

**Infra:** Docker optimization, Linux, PostgreSQL, vector databases, deployment automation

## Languages

---

**English:** Professional working proficiency (B1/B2). Strong technical reading and writing; effective communication in distributed engineering teams.

**Spanish:** Native speaker

## Community

---

[Speaker at national](#) and international conferences.

Member of Python Argentina, the most important Python community in Latin America.

Founding member of Open Data Córdoba, a civic hacktivism collective in Córdoba, Argentina (elections transparency, retail prices, and more).

Frequently provide pro bono mentoring and coaching to junior developers interested in the Python language.
